Institut d'Investigació Biomèdica de Girona Dr. Josep Trueta (IDIBGI)

Dear Sir or Madam,

I am a third-year student of Physical Engineering with a strong interest in data analysis and its applications to scientific and biomedical research fields. My academic background combines physics, statistics, and computational methods for solving the analysis of complex datasets.

During my studies I have developed skills in quantitative modelling and data analysis, and I am particularly interested in applying, for instance, these tools to biomedical and clinical datasets. Fundamentally, my motivation relies on the prospect of contributing to research areas where data analysis can support the enhanced understanding of real medical problems.

Although I currently study in Barcelona, I am originally from Llagostera, Girona. For this reason, I would be very interested in the opportunity to collaborate with a research group at IDIBGI, either through summer work or, potentially, in connection with my future bachelor thesis.

Thank you very much for your time and consideration.

Kind regards,

Pau Monterosa
